BILLING CODE: 4150-03

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Third Amendment to Declaration Under the Public Readiness and Emergency Preparedness Act for Medical Countermeasures Against COVID-19

ACTION: Notice of amendment.

SUMMARY: The Secretary issues this amendment pursuant to section 319F-3 of the Public Health Service Act to add additional categories of Qualified Persons and amend the category of disease, health condition, or threat for which he recommends the administration or use of the Covered Countermeasures.

DATES: This amendment to the Declaration published on March 17, 2020 (85 FR 15198) is effective as of [DATE THIS AMENDMENT UPON PUBLICATION INTO THE FEDERAL REGISTER].

FOR FURTHER INFORMATION CONTACT: Robert P. Kadlec, MD, MTM&H, MS, Assistant Secretary for Preparedness and Response, Office of the Secretary, Department of Health and Human Services, 200 Independence Avenue SW, Washington, DC 20201; Telephone: 202-205-2882.

SUPPLEMENTARY INFORMATION: The Public Readiness and Emergency Preparedness Act (PREP Act) authorizes the Secretary of Health and Human Services (the Secretary) to issue a Declaration to provide liability immunity to certain individuals and entities (Covered Persons) against any claim of loss caused by, arising out of, relating to, or resulting from the manufacture, distribution, administration, or use of medical countermeasures (Covered Countermeasures), except for claims involving “willful misconduct” as defined in the PREP Act. Under the PREP Act, a Declaration may be amended as circumstances warrant.

The PREP Act was enacted on December 30, 2005, as Public Law 109–148, Division C, § 2. It amended the Public Health Service (PHS) Act, adding section 319F–3, which addresses liability immunity, and section 319F–4, which creates a compensation program. These sections are codified at 42 U.S.C. 247d–6d and 42 U.S.C. 247d–6e, respectively. Section 319F-3 of the PHS Act has been amended by the Pandemic and All-Hazards Preparedness Reauthorization Act (PAHPRA), Public Law 113-5, enacted on March 13, 2013 and the Coronavirus Aid, Relief, and Economic Security (CARES) Act, Public Law 116–136, enacted on March 27, 2020, to expand Covered Countermeasures under the PREP Act.

On January 31, 2020, the Secretary declared a public health emergency pursuant to section 319 of the PHS Act, 42 U.S.C. 247d, effective January 27, 2020, for the entire United States to aid in the response of the nation’s health care community to the COVID–19 outbreak. Pursuant to section 319 of the PHS Act, the Secretary renewed that declaration on April 26, 2020, and July 25, 2020. On March 10, 2020, the Secretary issued a Declaration under the PREP Act for medical countermeasures against COVID–19 (85 FR 15198, Mar. 17, 2020) (the Declaration). On April 10, the Secretary amended the Declaration under the PREP Act to extend liability immunity to covered countermeasures authorized under the CARES Act (85 FR 21012, Apr. 15, 2020). On June 4, the Secretary

amended the Declaration to clarify that covered countermeasures under the Declaration include qualified countermeasures that limit the harm COVID-19 might otherwise cause.

The Secretary now amends section V of the Declaration to identify as qualified persons covered under the PREP Act, and thus authorizes, certain State-licensed pharmacists to order and administer, and pharmacy interns (who are licensed or registered by their State board of pharmacy and acting under the supervision of a State-licensed pharmacist) to administer, any vaccine that the Advisory Committee on Immunization Practices (ACIP) recommends to persons ages three through 18 according to ACIP's standard immunization schedule (ACIP-recommended vaccines).¹

The Secretary also amends section VIII of the Declaration to clarify that the category of disease, health condition, or threat for which he recommends the administration or use of the Covered Countermeasures includes not only COVID-19 caused by SARS-CoV-2 or a virus mutating therefrom, but also other diseases, health conditions, or threats that may have been caused by COVID-19, SARS-CoV-2, or a virus mutating therefrom, including the decrease in the rate of childhood immunizations, which will lead to an increase in the rate of infectious diseases.

Description of This Amendment by Section

Section V. Covered Persons

Under the PREP Act and the Declaration, a “qualified person” is a “covered person.” Subject to certain limitations, a covered person is immune from suit and liability under Federal and State law with respect to all claims for loss caused by, arising out of, relating to, or resulting from the administration or use of a covered countermeasure if a declaration under subsection (b) has been issued with respect to such countermeasure. “Qualified person” includes

- (A) a licensed health professional or other individual who is authorized to prescribe, administer, or dispense such countermeasures under

¹ The only vaccines that ACIP has recommended are authorized or licensed by the Food and Drug Administration (FDA). PREP Act coverage here is limited to covered persons ordering and administering FDA-authorized or FDA-licensed vaccines.

the law of the State in which the countermeasure was prescribed, administered, or dispensed; or

(B) “a person within a category of persons so identified in a declaration by the Secretary” under subsection (b) of the PREP Act.

42 U.S.C. 247d-6d(i)(8).²

By this amendment to the Declaration, the Secretary identifies an additional category of persons who are qualified persons under section 247d-6d(i)(8)(B).³

On May 8, 2020, CDC reported, “The identified declines in routine pediatric vaccine ordering and doses administered might indicate that U.S. children and their communities face increased risks for outbreaks of vaccine-preventable diseases,” and suggested that a decrease in rates of routine childhood vaccinations were due to changes in healthcare access, social distancing, and other COVID-19 mitigation strategies.⁴ The report also stated that “[p]arental concerns about potentially exposing their children to COVID-19 during well child visits might contribute to the declines observed.”⁵

On July 10, 2020, CDC reported its findings of a May survey it conducted to assess the capacity of pediatric health care practices to provide immunization services to children during the COVID-19

Santoli et al., *Effects of the COVID-19 Pandemic on Routine Pediatric Vaccine Ordering and Administration — United States, 2020*, 69 MMWR 591, 592 (2020), <https://www.cdc.gov/mmwr/volumes/69/wr/pdfs/mm6919e2-H.pdf> (last visited July 15, 2020); see also Melissa Jenco, *AAP urges vaccination as rates drop due to COVID-19*, AAP NEWS (May 8, 2020), <https://www.aappublications.org/news/2020/05/08/covid19vaccinations050820> (last visited July 15, 2020).

⁵ Jeanne M. Santoli et al., *Effects of the COVID-19 Pandemic on Routine Pediatric Vaccine Ordering and Administration — United States, 2020*, 69 MMWR 591, 592 (2020), <https://www.cdc.gov/mmwr/volumes/69/wr/pdfs/mm6919e2-H.pdf> (last visited July 15, 2020).

pandemic. The survey, which was limited to practices participating in the Vaccines for Children program, found that, as of mid-May, 15 percent of Northeast pediatric practices were closed, 12.5 percent of Midwest practices were closed, 6.2 percent of practices in the South were closed, and 10 percent of practices in the West were closed. Most practices had reduced office hours for in-person visits. When asked whether their practices would likely be able to accommodate new patients for immunization services through August, 418 practices (21.3 percent) either responded that this was not likely or the practice was permanently closed or not resuming immunization services for all patients, and 380 (19.6 percent) responded that they were unsure. Urban practices and those in the Northeast were less likely to be able to accommodate new patients compared with rural practices and those in the South, Midwest, or West.⁶

In response to these troubling developments, CDC and the American Academy of Pediatrics have stressed, “Well-child visits and vaccinations are essential services and help make sure children are protected.”⁷

The Secretary re-emphasizes that important recommendation to parents and legal guardians here: If your child is due for a well-child visit, contact your pediatrician’s or other primary-care provider’s office and ask about ways that the office safely offers well-child visits and vaccinations.

Many medical offices are taking extra steps to make sure that well-child visits can occur safely during the COVID-19 pandemic, including:

- Scheduling sick visits and well-child visits during different times of the day or days of the week, or at different locations.

⁶ Tara M. Vogt, *Provision of Pediatric Immunization Services During the COVID-19 Pandemic: an Assessment of Capacity Among Pediatric Immunization Providers Participating in the Vaccines for Children Program — United States, May 2020*, 69 MMWR 859, 859-61, <https://www.cdc.gov/mmwr/volumes/69/wr/pdfs/mm6927a2-H.pdf> (last visited July 15, 2020).

⁷ *Routine Vaccination During the COVID-19 Outbreak*, CDC, <https://www.cdc.gov/vaccines/parents/visit/vaccination-during-COVID-19.html> (last visited July 14, 2020).

- Asking patients to remain outside until it is time for their appointments to reduce the number of people in waiting rooms.
- Adhering to recommended social (physical) distancing and other infection-control practices, such as the use of masks.

The decrease in childhood-vaccination rates is a public health threat and a collateral harm caused by COVID-19. Together, the United States must turn to available medical professionals to limit the harm and public health threats that may result from decreased immunization rates. We must quickly do so to avoid preventable infections in children, additional strains on our healthcare system, and any further increase in avoidable adverse health consequences—particularly if such complications coincide with additional resurgence of COVID-19.

Together with pediatricians and other healthcare professionals, pharmacists are positioned to expand access to childhood vaccinations. Many States already allow pharmacists to administer vaccines to children of any age.^{8,9} Other States permit pharmacists to administer vaccines to children

⁸ For purposes of this amendment, “State” shall have the same meaning ascribed to it in 42 U.S.C. 201(f). Under section 201(f), “State” includes the several States, the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands.

¹¹ *See, e.g.*, Conn. Gen. Stat. § 20-633(a) (West 2012); 24 Del. Code Ann. § 2502(23)(h) (West 2020); Fla. Stat. Ann. § 465.189(1) (West 2020); Vt. Admin. R. of Board of Pharm. § 10.35 (West 2020).

¹² *See, e.g.*, Or. Admin. R. 855-019-0270 (2020) (“[A]n intern who is appropriately trained and qualified in accordance with Section (3) of this rule may perform the same duties as a pharmacist, provided that the intern is supervised by an appropriately trained and qualified pharmacist.”).

¹³ *See, e.g., Guidance for Pharmacists and Pharmacy Technicians in Community Pharmacies during the COVID-19 Response*, CDC, <https://www.cdc.gov/coronavirus/2019-ncov/hcp/pharmacies.html> (last updated June 28, 2020) (“As a vital part of the healthcare system, pharmacies play an important role in providing medicines, therapeutics, vaccines, and critical health services to the public.”); Kimberly McKeirnan & Gregory Sarchet, *Implementing Immunizing Pharmacy Technicians in a Federal Healthcare Facility*, 7 PHARMACY 1, 7 (2019), <https://www.mdpi.com/2226-4787/7/4/152/htm> (last visited Aug. 5, 2020) (HHS Indian Health Service study demonstrating “the effective implementation of immunization-trained pharmacy technicians and the positive impact utilization of pharmacy support personnel can create” on childhood vaccination rates in medically underserved populations).

miles of a community pharmacy.¹⁴ Pharmacies often offer extended hours and added convenience. What is more, pharmacists are trusted healthcare professionals with established relationships with their patients. Pharmacists also have strong relationships with local medical providers and hospitals to refer patients as appropriate.

For example, pharmacists already play a significant role in annual influenza vaccination. In the early 2018-19 season, they administered the influenza vaccine to nearly a third of all adults who received the vaccine.¹⁵ Given the potential danger of serious influenza and continuing COVID-19 outbreaks this autumn and the impact that such concurrent outbreaks may have on our population, our healthcare system, and our whole-of-nation response to the COVID-19 pandemic, we must quickly expand access to influenza vaccinations. Allowing more qualified pharmacists to administer the influenza vaccine to children will make vaccinations more accessible.

Therefore, the Secretary amends the Declaration to identify State-licensed pharmacists (and pharmacy interns acting under their supervision if the pharmacy intern is licensed or registered by his or her State board of pharmacy) as qualified persons under section 247d-6d(i)(8)(B) when the pharmacist orders and either the pharmacist or the supervised pharmacy intern administers vaccines to individuals ages three through 18 pursuant to the following requirements:

- The vaccine must be FDA-authorized or FDA-licensed.
- The vaccination must be ordered and administered according to ACIP's standard immunization schedule.¹⁶

¹⁵ *Early-Season Flu Vaccination Coverage – United States, November 2018*, CDC, <https://www.cdc.gov/flu/fluview/nifs-estimates-nov2018.htm> (last visited July 14, 2020).

¹⁶ *See Immunization Schedules: For Health Care Providers*, CDC, <https://www.cdc.gov/vaccines/schedules/hcp/index.html> (last visited July 14, 2020). The immunization schedule recommends that certain vaccines be administered only to children of a certain age. For example, the second dose of both the measles, mumps, and rubella vaccine, as well as the varicella vaccine, should not be administered until a child is between four and six years old. *See Recommended Child and Adolescent Immunization Schedule for*

- The licensed pharmacist must complete a practical training program of at least 20 hours that is approved by the Accreditation Council for Pharmacy Education (ACPE). This training program must include hands-on injection technique, clinical evaluation of indications and contraindications of vaccines, and the recognition and treatment of emergency reactions to vaccines.¹⁷
- The licensed or registered pharmacy intern must complete a practical training program that is approved by the ACPE. This training program must include hands-on injection technique, clinical evaluation of indications and contraindications of vaccines, and the recognition and treatment of emergency reactions to vaccines.¹⁸
- The licensed pharmacist and licensed or registered pharmacy intern must have a current certificate in basic cardiopulmonary resuscitation.¹⁹
- The licensed pharmacist must complete a minimum of two hours of ACPE-approved, immunization-related continuing pharmacy education during each State licensing period.²⁰
- The licensed pharmacist must comply with recordkeeping and reporting requirements of the jurisdiction in which he or she administers vaccines, including informing the patient's primary-care provider when available, submitting the required immunization information to the State or local immunization information system (vaccine registry), complying with requirements with respect to reporting adverse events, and complying with requirements

ages 18 years or younger, United States, 2020, CDC (Jan. 29, 2020), <https://www.cdc.gov/vaccines/schedules/downloads/child/0-18yrs-child-combined-schedule.pdf> (last visited Aug. 5, 2020).

whereby the person administering a vaccine must review the vaccine registry or other vaccination records prior to administering a vaccine.²¹

- The licensed pharmacist must inform his or her childhood-vaccination patients and the adult caregivers accompanying the children of the importance of a well-child visit with a pediatrician or other licensed primary-care provider and refer patients as appropriate.²²

These requirements are consistent with those in many States that permit licensed pharmacists to order and administer vaccines to children and permit licensed or registered pharmacy interns acting under their supervision to administer vaccines to children.²³

Administering vaccinations to children age three and older is less complicated and requires less training and resources than administering vaccinations to younger children. That is because ACIP generally recommends administering intramuscular injections in the deltoid muscle for individuals age three and older.²⁴ For individuals less than three years of age, ACIP generally recommends administering intramuscular injections in the anterolateral aspect of the thigh muscle.²⁵ Administering injections in the thigh muscle often presents additional complexities and requires additional training and

resources including additional personnel to safely position the child while another healthcare professional injects the vaccine.²⁶

Moreover, as of 2018, 40% of three-year-olds were enrolled in preprimary programs (i.e. preschool or kindergarten programs).²⁷ Preprimary programs are beginning in the coming weeks or months, so the Secretary has concluded that it is particularly important for individuals ages three through 18 to receive ACIP-recommended vaccines according to ACIP's standard immunization schedule. All States require children to be vaccinated against certain communicable diseases as a condition of school attendance. These laws often apply to both public and private schools with identical immunization and exemption provisions.²⁸ As nurseries, preschools, kindergartens, and schools reopen, increased access to childhood vaccinations is essential to ensuring children can return.

Notwithstanding any State or local scope-of-practice legal requirements, (1) qualified licensed pharmacists are identified as qualified persons to order and administer ACIP-recommended vaccines and (2) qualified State-licensed or registered pharmacy interns are identified as qualified persons to administer the ACIP-recommended vaccines ordered by their supervising qualified licensed pharmacist.²⁹

²⁸ State School Immunization Requirements and Vaccine Exemption Laws, <https://www.cdc.gov/phlp/docs/school-vaccinations.pdf>, (last visited July 29, 2020).

²⁹ Nothing herein shall affect federal law requirements in 42 C.F.R. Part 455, subpart E regarding screening and enrollment of Medicare and Medicaid providers. Moreover, nothing herein shall preempt State laws that permit additional individuals to administer vaccines that ACIP recommends to persons age 18 or younger according to ACIP's standard immunization schedule. For example, Idaho permits pharmacy technicians who meet certain requirements to administer vaccines under the supervision of an immunizing pharmacist. Such technicians can still administer vaccines to the extent they would have been able to absent publication of this amendment. Moreover, pharmacists and pharmacy interns may still order or administer vaccines to individuals ages two or younger to the extent authorized under State law.

Both the PREP Act and the June 4, 2020 Second Amendment to the Declaration define “covered countermeasures” to include qualified pandemic and epidemic products that “limit the harm such pandemic or epidemic might otherwise cause.”³⁰ The troubling decrease in ACIP-recommended childhood vaccinations and the resulting increased risk of associated diseases, adverse health conditions, and other threats are categories of harms otherwise caused by COVID-19 as set forth in Sections VI and VIII of this Declaration.³¹ Hence, such vaccinations are “covered countermeasures” under the PREP Act and the June 4, 2020 Second Amendment to the Declaration.

Nothing in this Declaration shall be construed to affect the National Vaccine Injury Compensation Program, including an injured party’s ability to obtain compensation under that program. Covered countermeasures that are subject to the National Vaccine Injury Compensation Program authorized under 42 U.S.C. 300aa-10 *et seq.* are covered under this Declaration for the purposes of liability immunity and injury compensation only to the extent that injury compensation is not provided under that Program. All other terms and conditions of the Declaration apply to such covered countermeasures.

Section VIII. Category of Disease, Health Condition, or Threat

As discussed, the troubling decrease in ACIP-recommended childhood vaccinations and the resulting increased risk of associated diseases, adverse health conditions, and other threats are categories of harms otherwise caused by COVID-19. The Secretary therefore amends section VIII, which describes the category of disease, health condition, or threat for which he recommends the admin-

istration or use of the Covered Countermeasures, to clarify that the category of disease, health condition, or threat for which he recommends the administration or use of the Covered Countermeasures is not only COVID-19 caused by SARS-CoV-2 or a virus mutating therefrom, but also other diseases, health conditions, or threats that may have been caused by COVID-19, SARS-CoV-2, or a virus mutating therefrom, including the decrease in the rate of childhood immunizations, which will lead to an increase in the rate of infectious diseases.

Amendments to Declaration

Amended Declaration for Public Readiness and Emergency Preparedness Act Coverage for medical countermeasures against COVID-19.

Sections V and VIII of the March 10, 2020 Declaration under the PREP Act for medical countermeasures against COVID-19, as amended April 10, 2020 and June 4, 2020, are further amended pursuant to section 319F-3(b)(4) of the PHS Act as described below. All other sections of the Declaration remain in effect as published at 85 FR 15198 (Mar. 17, 2020) and amended at 85 FR 21012 (Apr. 15, 2020) and 85 FR 35100 (June 8, 2020).

1. Covered Persons, section V, delete in full and replace with:

V. Covered Persons

42 U.S.C. 247d-6d(i)(2), (3), (4), (6), (8)(A) and (B)

Covered Persons who are afforded liability immunity under this Declaration are “manufacturers,” “distributors,” “program planners,” “qualified persons,” and their officials, agents, and employees, as those terms are defined in the PREP Act, and the United States.

In addition, I have determined that the following additional persons are qualified persons: (a) Any person authorized in accordance with the public health and medical emergency response of the Authority Having Jurisdiction, as described in Section VII below, to prescribe, administer, deliver, distribute or dispense the Covered Countermeasures, and their officials, agents, employees, contractors and volunteers, following a Declaration of an emergency; (b) any person authorized to prescribe, administer, or dispense the Covered Countermeasures or who is otherwise authorized to perform an activity under an Emergency Use Authorization in accordance with Section 564 of the FD&C Act; (c) any person authorized to prescribe, administer, or dispense Covered Countermeasures in accordance with Section 564A of the FD&C Act; and (d) a State-licensed pharmacist who orders and administers, and pharmacy interns who administer (if the pharmacy intern acts under the supervision of such pharmacist and the pharmacy intern is licensed or registered by his or her State board of pharmacy), vaccines that the Advisory Committee on Immunization Practices (ACIP) recommends to persons ages three through 18 according to ACIP's standard immunization schedule.

Such State-licensed pharmacists and the State-licensed or registered interns under their supervision are qualified persons only if the following requirements are met:

- The vaccine must be FDA-authorized or FDA-licensed.
- The vaccination must be ordered and administered according to ACIP's standard immunization schedule.
- The licensed pharmacist must complete a practical training program of at least 20 hours that is approved by the Accreditation Council for Pharmacy Education (ACPE). This training program must include hands-on injection technique, clinical evaluation of indications and contraindications of vaccines, and the recognition and treatment of emergency reactions to vaccines.
- The licensed or registered pharmacy intern must complete a practical training program that is approved by the ACPE. This training program must include hands-on injection technique, clinical evaluation of indications and contraindications of vaccines, and the recognition and treatment of emergency reactions to vaccines.

- The licensed pharmacist and licensed or registered pharmacy intern must have a current certificate in basic cardiopulmonary resuscitation.
- The licensed pharmacist must complete a minimum of two hours of ACPE-approved, immunization-related continuing pharmacy education during each State licensing period.
- The licensed pharmacist must comply with recordkeeping and reporting requirements of the jurisdiction in which he or she administers vaccines, including informing the patient's primary-care provider when available, submitting the required immunization information to the State or local immunization information system (vaccine registry), complying with requirements with respect to reporting adverse events, and complying with requirements whereby the person administering a vaccine must review the vaccine registry or other vaccination records prior to administering a vaccine.
- The licensed pharmacist must inform his or her childhood-vaccination patients and the adult caregiver accompanying the child of the importance of a well-child visit with a pediatrician or other licensed primary-care provider and refer patients as appropriate.

Nothing in this Declaration shall be construed to affect the National Vaccine Injury Compensation Program, including an injured party's ability to obtain compensation under that program. Covered countermeasures that are subject to the National Vaccine Injury Compensation Program authorized under 42 U.S.C. 300aa-10 *et seq.* are covered under this Declaration for the purposes of liability immunity and injury compensation only to the extent that injury compensation is not provided under that Program. All other terms and conditions of the Declaration apply to such covered countermeasures.

2. Category of Disease, Health Condition, or Threat, section VIII, delete in full and replace with:

VIII. Category of Disease, Health Condition, or Threat
42 U.S.C. 247d-6d(b)(2)(A)

The category of disease, health condition, or threat for which I recommend the administration or use of the Covered Countermeasures is not only COVID-19 caused by SARS-CoV-2 or a virus mutating therefrom, but also other diseases, health conditions, or threats that may have been caused

by COVID-19, SARS-CoV-2, or a virus mutating therefrom, including the decrease in the rate of childhood immunizations, which will lead to an increase in the rate of infectious diseases.

Authority: 42 U.S.C. § 247d–6d.

Dated:

Alex M. Azar II,

Secretary of Health and Human Services.
