

DMACS Wave 14 Toplines • November 3 - December 15, 2021

The Detroit Metro Area Communities Study (DMACS) is a panel survey of Detroit residents launched in 2016. The original panel of respondents was drawn from an address-based probability sample of all occupied Detroit households. In subsequent years, the panel has been refreshed through additional address-based sampling. We invited 2,662 previously-enrolled panelists to participate in this survey wave. Surveys were self-administered online or interviewer-administered via telephone between November 3, 2021 and December 15, 2021. We report results for the 1,900 Detroit residents who completed the survey. We obtained an overall response rate of 71% (using AAPOR Response Rate 1).

The below results reflect weighted responses. Wave 14 is based on a stratified random sample. Survey weights were calculated in two stages: In the first stage, we used the technique of post-stratification to account for the differential selection probabilities due to sample stratification and the unequal response rates across strata. The sampling strata were defined as Detroit neighborhoods as demarcated by the Department of Neighborhoods staff in concert with community groups. We calibrated the sample to match the estimated population aged 18 and above in the sampling strata. In the second stage, we applied raking to adjust the weights to match the estimated distributions on gender, age, race, education, and income based on the U.S. Census Bureau’s 2019 American Community Survey (ACS). The margin of error for a simulated Bernoulli variable ($p= 0.5$) is 3.1 percentage points at the 95% confidence level. The actual margin of sampling error varies by statistics.

This survey wave was undertaken as part of a collaborative data collection effort across 22 states through the NIH Community Engagement Alliance (CEAL) Against COVID-19 Disparities. Questions common to survey instruments across this collaborative are indicated as [CEAL core survey items](#).

Sample Demographics

The below demographics summarize select characteristics of the weighted survey sample.

Gender	Male	37%
	Female	62%
	Different gender identification	1%
Age	<35	32%
	35-54	32%
	55-64	17%
	65+	20%
Race/Ethnicity	Non-Hispanic White Alone	11%
	Non-Hispanic Black Alone	77%
	Non-Hispanic Other (including multirace)	4%
	Hispanic	8%

Highest level of school completed	Less than high school	16%
	High school diploma or equivalent	35%
	Some college/Associates degree	33%
	College +	17%

Household income	<\$10,000	18%
	\$10,000-\$29,999	28%
	\$30,000-\$49,999	21%
	\$50,000-\$99,999	23%
	\$100,000+	11%

Survey Results

Block 1: Residence

1. About how long have you lived at your current address? [current_res_len_d14]	Less than six months	4%
	Six months to 1 year	4%
	1 to 5 years	30%
	6 to 10 years	19%
	11 to 20 years	17%
	More than 20 years	25%
