

art for kids

This outdoor hide-a-key makes a unique Father's Day gift. Finding the camouflage supplies is half the fun of creating this great gift. And you're helping the environment by recycling a pill bottle.

Here's the supplies that you'll need:

- Empty pill bottle
- Brown, black, green permanent markers
- Stone, pinecone, large twig, or fairy garden figurine
- E6000 adhesive

art for kids

Let's make the hide-a-key:

1. Take a nature walk to gather what you'll put on the top of the hide-a-key. You'll want something that will blend with where you'll bury the hide-a-key.
2. To help with camouflaging the hide-a-key color the bottle cap with dark markers—black, brown, or dark green—that will blend in where the hide-a-key will be buried.

3. Put a healthy dollop of E6000 adhesive on the bottle cap and glue your camouflage piece in place. Let the adhesive dry thoroughly.

4. Dad will need to add a key to the bottle, and bury it after you give it to him. The hide-a-key can be buried in landscaping shrubbery or hidden in an outdoor flower pot
